Fine tune for success

What is maturity, and why's it so important?

Organizational maturity is a measure of an organization's ability to deliver predictable outcomes including on-time delivery, productivity, quality, compliance, and customer satisfaction.

Crucially, it has a proven link to an organization's likely success.

In short, the **higher your client's P3M3 maturity score, the more likely they are to achieve their organizational objectives and be successful.**

As an internationally recognized benchmark, a P3M3 maturity rating can also be shared externally to help your clients drive confidence in their organizational capability.

P3M3 helped London Underground to save money, provide a better service and empower its staff.

What is

P3M3[®]

P3M3 is a recognized best practice management maturity model.

It's used by consultants and approved training organizations across the globe to assess how their clients deliver management of portfolios, programmes and projects to identify opportunities for improvement.

What makes it unique?

P3M3 is a proven maturity model with a name that's trusted by clients across the globe.

It's independent of any proprietary management approach, easy to tailor and can be deployed in a variety of ways to suit the needs and focus areas agreed by you and your client.

But most importantly, unlike some maturity models, P3M3 looks at more than just process. Instead, it analyses the balance between process, tools, management information and the competency of key personnel to give a truly **objective, integrated and holistic** picture.

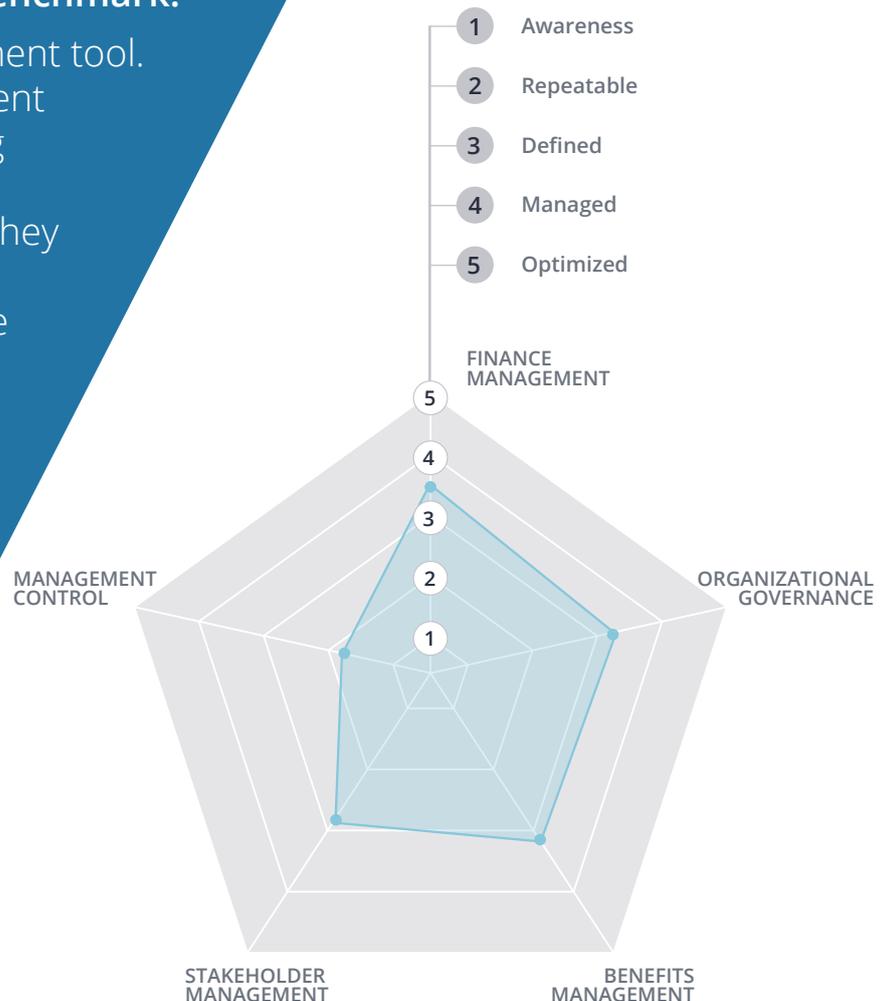

How does it work?

P3M3 allows you to compare your client's current portfolio, programme and project practices against other organizations to obtain a benchmark.

But it's more than an assessment tool. After revealing where your client currently sits on an increasing scale of maturity, it helps you advise them on exactly what they need to do to **fine tune** their operation and progress to the next level (where improved quality and reduced risk await).

It's all designed to make it easier for you to provide your clients with a business improvement roadmap that helps them prioritize their activities and resources.

Example organization maturity map

P3M3 reviews organizational maturity and performance against up to seven perspectives. The new digital version of P3M3 allows you to share data visualizations across these perspectives to help give your client an 'at-a-glance' picture of their maturity status.

5 maturity levels

P3M3® was used to evaluate three National Health Service (NHS) organizations to assess their levels of organizational ability, highlight areas for development and strategize for an improved approach. The NHS is the publicly funded healthcare system in the United Kingdom.

When the time comes for an organization to obtain an objective view of their maturity to start making improvements, they'll need the full P3M3 assessment, which can only be accessed via an approved Axelos Consulting Partner.

Since 2015, PM Solutions continues to be a licensed Axelos Consulting Partner and Axelos P3M3 maturity model Consulting Partner, and are accredited to be able to provide exclusive benefits to organisations undertaking P3M3 maturity assessments.
